Search Notes

Dear Examiner BARTLEY:

Please find attached the results of your FULL TEMPLATE for class/subclass search for the above-referenced case. The search was conducted in Dialog, Google Patents, ProQuest, and EBSCO.

I have listed *potential* references of interest in the first part of the search results. However, please be sure to scan through the entire report. There may be additional references that you find useful.

Please note that the results, after the potential references of interest, proceed through an Inventor search (which is provided without regard to priority date, and in GREEN TEXT) and then to results in both Abstract and Full Text databases (which are more directly screened for priority date).

If you have any questions about the search, or need a refocus, please do not hesitate to contact me.

Thank you for using the EIC, and we look forward to your next search!

XRPX Acc No: N2003-568116

Automatic return target generation method for potential real estate deal e.g. debt transaction, involves calculating return target on investment based on collateral type information and supplemental information

Patent Assignee: DAY J L (DAYJ-L); EARLE D (EARL-D); OPSAHL-ONG L R (OPSA-L)

Inventor: DAY J L; EARLE D; OPSAHL-ONG L R

Automatic return target generation method for potential real estate deal e.g. debt transaction, involves calculating return target on investment based on collateral type information... **Original Titles:** Systems and methods to automatically generate a return target for a potential real estate deal based on supplemental deal information **Inventor:** DAY J L... ..EARLE D **Alerting Abstract ...NOVELTY -** The collateral type information such as multifamily, retail, industrial information and supplemental deal information such as deal name, deal size, provided by deal originator device (10), is received by deal controller (400), through network (20). The return target on investment, is automatically calculated, based on... .. computer implemented method for generated target loan spread; deal controller; medium storing instructions for generating return target; and method for facilitating origination of real estate deal. **USE -** For potential real estate deal such as equity transaction and debt transaction e.g. loan, mortgage, associated with commercial real estate portfolio.... .. **ADVANTAGE -** Reduces time and effort taken to process real estate deal, by generating return target automatically, so that ultimate decision of load spread is provided quickly to the customer.... .. **DESCRIPTION OF DRAWINGS -** The figure shows a block diagram of the real estate deal system. 10 deal originator device 400 deal controller **Title Terms .../Index Terms/Additional Words:** DEAL; **Class Codes** Original Publication Data by Authority/Argentina **Publication No.** ...**Inventor name & address:** Day, Jayne L... ..Earle, Dan **Original Abstracts:** Systems and methods are provided to automatically generate a return target for a potential real estate deal based on supplemental deal information. According to one embodiment, a collateral type associated with a potential real estate deal is determined. For example, a deal originator may provide this information to deal controller via a communication network. Supplemental deal information associated with the deal is received, and a return target for the deal is then automatically generated based on the collateral type and the supplemental deal information. The return target may represent, for example, a loan spread required for approval of the deal. **Claims:** What is claimed is: 1. A method of generating return targets for potential real estate deals, comprising: determining a collateral type associated with a potential real estate deal; receiving supplemental deal information associated with the potential real estate deal; and automatically generating a return target for the potential real estate deal based on the collateral type and the supplemental deal information.
